PROFESSIONAL SUMMARY

Detail-oriented and analytical Data Analyst with a Diploma in Data Science and a Bachelor's degree in BBA (Computer Applications). Proficient in Python, SQL, Excel, Power BI, Pandas, and NumPy for data cleaning, analysis, visualization, and reporting. Hands-on experience in building data-driven projects, predictive analytics, and dashboards. Passionate about transforming raw data into meaningful business insights and seeking an entry-level Data Analyst role to leverage analytical, problem-solving, and data visualization skills for driving business decisions through data.

TECHNICAL SKILLS

Programming Languages: Python, SQL
Data Analysis: Data Cleaning, Data Wrangling, Exploratory Data Analysis (EDA), Data Visualization, Dashboard Development, KPI Reporting, Business Intelligence (BI), Data Modeling, ETL, Power Query, DAX
Libraries: Pandas, NumPy, Matplotlib, Seaborn
Tools: Microsoft Excel, Power BI, Jupyter Notebook, Git, GitHub, MS Office
Database: MySQL, SQL
Excel Skills: Pivot Tables, VLOOKUP, XLOOKUP
SQL Skills: Joins, Window Functions
Concepts: Statistics (Basic), Predictive Analytics, Machine Learning (Basics)

ACADEMIC PROJECTS

Blinkit Sales Analytics Dashboard

Technologies: Power BI, SQL, Excel

- Developed an interactive Power BI dashboard to analyze Blinkit sales and business performance.
- Performed data cleaning and transformation using Excel and SQL for accurate reporting.
- Analyzed key metrics including Total Sales, Product Categories, Outlet Performance, Customer Ratings, and Sales Trends.
- Created KPI dashboards with dynamic filters to support data-driven business decisions.
- Generated actionable insights to identify top-performing products and improve overall sales performance.

Stock Market Performance Analytics

Technologies: Python, Pandas, NumPy, Matplotlib, Seaborn

- Analyzed historical stock market data to evaluate price trends, returns, and trading volume.
- Performed exploratory data analysis (EDA) and calculated moving averages, daily returns, and volatility.
- Compared the performance of multiple companies using statistical analysis and visualizations.
- Built interactive charts to identify market trends and investment patterns.
- Delivered data-driven insights to support financial analysis and decision-making.

AI Job Market Analytics

Technologies: Python, SQL, Power BI, Pandas, Excel

- Collected and analyzed AI job market data to identify hiring trends and in-demand skills.
- Examined job opportunities by location, experience level, industry, and work mode (Remote/On-site).
- Created interactive Power BI dashboards to visualize skill demand, hiring companies, and job distribution.
- Performed data cleaning, transformation, and exploratory data analysis (EDA) to generate meaningful insights.
- Presented business-focused reports to support career planning and job market analysis.
